

**FUND'S STRATEGY**

The investment objective of the fund's assets is to achieve a higher than average return by assuming medium risk. The fund's investments are evenly distributed between corporate equities and bonds issued or guaranteed by governments, central banks, bank deposits or corporate bonds. Structure: 50 percent – equities, 50 percent – bonds.

**COMMENT**

The second quarter was another difficult time for the markets after a rough start to the year. Prices continued to correct during the quarter, with negative returns on all major world equity indices. We cannot, however, say that a recession is inevitable, since the periods of negative returns are being followed by episodes of rising stock values driven by positive expectations. Markets are in a state of extremely high volatility as different factors influence asset values in opposing ways. Investor sentiment has been negatively affected by the geopolitical tensions that the Russia-Ukraine war has sparked and by rising inflation. Seeking to curb inflation expectations, the US Federal Reserve and the European Central Bank have joined other central banks around the world in a cycle of monetary tightening. The Fed unveiled its most aggressive rate hike since 1994, while the ECB suspended additional bond purchases and is preparing to raise interest rates at upcoming meetings. Further economic developments will depend on whether the Fed and the ECB succeed in cooling inflation and overheated economies without excessively hurting growth or provoking a stagflationary debt crisis. But we cannot say for certain whether the market's trajectory going forward will be positive or negative, as that will depend on a number of conflicting factors: further geopolitical developments, inflation rates, monetary tightening by the major central banks, economic indicators, corporate results for the first half of the year, the evolution of the COVID-19 pandemic, and so on.

Unsurprisingly, bond markets have seen a strong sell-off since the start of the year, driven by rising inflation and central bankers' changing rhetoric. However, in terms of bond yields, after a difficult first half of the year, yields on both low-risk and speculative-grade corporate and sovereign bonds are again becoming attractive compared to the dividend rates on equity markets. Also, as yields have risen, real interest rates have returned to more neutral levels and this may soon become a buying opportunity.

We continue giving investments in value stocks a heavier weight in our funds than they have in the respective benchmark indices because we believe these stocks tend to outperform in an inflationary environment. We are also investing more in UK equities, as they are undervalued relative to other global stocks and rising commodity prices are bolstering the outlook for UK returns. Over the last quarter, UK equities lost less than 6% of their value, while European equities plummeted 9%.

**PERFORMANCE SINCE FUND INCEPTION**

**FUND'S RETURN IN DIFFERENT PERIODS**

	Fund's return	Benchmark return
II quarter of 2022	-7.79%	-9.51%
1 year	-11.90%	-19.05%
3 years	5.40%	0.31%
5 years	14.65%	11.71%
Since Fund Inception	94.06%	-

Please note that the fund's past performance does not guarantee the same results and profitability in the future. Past performance is not a reliable indicator of future results.

\*The pension fund benchmark was applied since 1 January 2013. The complex benchmark index has been applied since 03/03/2022: 10% Bloomberg Barclays Series-E Euro Govt 7-10 Yr Bond Index (BERPG4 Index) 10% ECPI Ethical EURO Corporate Bond Index (ECAPECB Index) + 10% J.P. Morgan Euro Emerging Markets Bond Index (EMBI) Global Diversified Europe (JPEFEUR Index) + 10% Bloomberg Pan-European High Yield (Euro) TR Index (I02591EU Index) + 10% J.P. Morgan Emerging Markets Bond Index (EMBI) Global Hedged Euro Index (JPEIGHEU Index) + 3% European Central Bank ESTR OIS Index (OISESTR Index) + 43% MSCI ACWI IMI Net Total Return USD Index (MIMUAWON Index) (converted into EUR) + 4% MSCI Emerging Markets Net Total Return USD Index (M1EF Index) (converted into EUR).

\*\*Geographical distribution is indicated with regard to the countries of the economic logic of the investment, as well as to the investment components of collective investment undertakings (CIUs) and exchange traded funds (ETFs), according to their reports. If those reports do not provide the investment components of CIUs or ETFs, the country of registration of the CIU or ETF shall be taken into account.

\*\*\*During the first 12 months after becoming a member of the pension fund, a 30% entry fee is applied to the pension contributions, which cannot exceed EUR 200 during this period but is deducted until the minimum amount of EUR 100 is reached. This fee applies only to new Participants, whose contracts are concluded after 14 October 2015, and to the participants who have transferred from a pension fund managed by another management company after that date. The participants who have transferred from another pension fund managed by the Management Company are not subject to the entry fee provided that the amount of funds transferred between the pension funds managed by the Management Company exceeds EUR 2000 and that more than 12 months have passed since the entry into force of the agreement in the other pension fund managed by the Management Company. When contributions to the fund are made by an employer for the benefit of its employees (participants), the entry fee to be deducted from each pension contribution paid by both the employer for the employee (participant) and the participant himself is determined by a separate agreement between the management company and the employer of the participants. This fee will depend on the number of employees (participants) involved in the accumulation scheme and other circumstances, but in any case will not exceed the maximum limit of deduction for each pension contribution paid as set out in the Fund Rules.

\*\*\*\*Deduction for the withdrawal of part of the funds accumulated in the Fund (from the amount to be withdrawn) applies when the funds are withdrawn within two calendar years from the last withdrawal. This deduction does not apply to pension fund participants who have acquired the right to a pension benefit in accordance with the procedure established in the Pension Fund Rules.

While participating in a 3rd pillar pension fund, you will be required to pay the fees specified in the rules of the respective fund. The money accumulated in a pension fund is invested according to the investment strategy specified in the rules of the relevant pension fund. When saving in pension funds, you assume the investment and investment-related risk. The value of a pension fund can go both up and down, and you can get back less than you invested. Past performance of a pension fund does not guarantee the same results and profitability in the future. Past performance is not a reliable indicator of future results. When seven or fewer years remain before retirement, consider investing in a conservative investment pension fund (INVL STABILO III 58+/INVL Stable).

Before you make an investment decision, assess all the risks associated with the investment yourself or with a help of investment consultants. Carefully read the rules of the pension fund, which are an integral part of the pension accumulation agreement.

A fund participant may choose from the following forms of pension payment: a lump sum, periodic payments in instalments (conversion of a portion of fund units in the pension account into money to be paid out at regular intervals) or purchase of an annuity from a life insurance company.
