

**GENERAL INFORMATION**

Start of operations	2022 07 01
Net asset value	150 412,81 EUR
Unit value of investment direction	97,16 EUR
Management fee	-

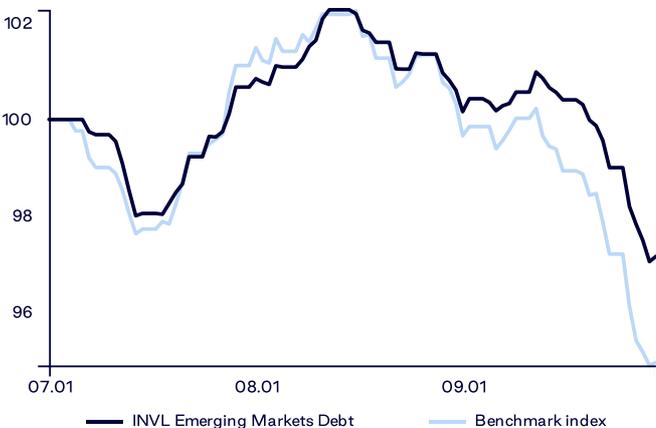

**INVESTMENT STRATEGY**

A fixed-income strategy that aims to achieve a return above the typical return of fixed-income investment products. This is achieved by selecting debt securities or equivalent investment objects, usually collective investment undertakings. The majority of assets are invested in debt securities of governments, municipalities and companies of developing countries (stock exchanges and markets), named by the credit analysis as the most credit worthy. Derivatives can be used to hedge against currency exchange rate change risk. The assets are currently invested in INVL Global Emerging Markets Bond Subfund.

**COMMENT**

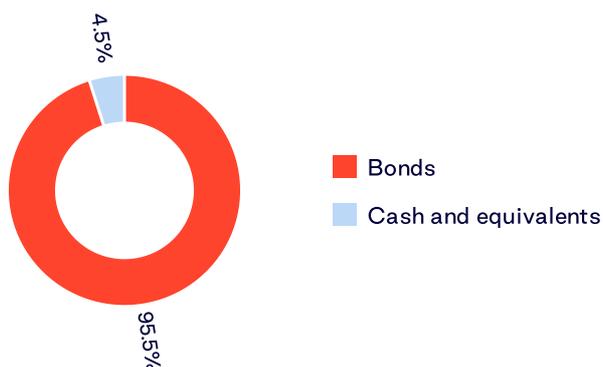

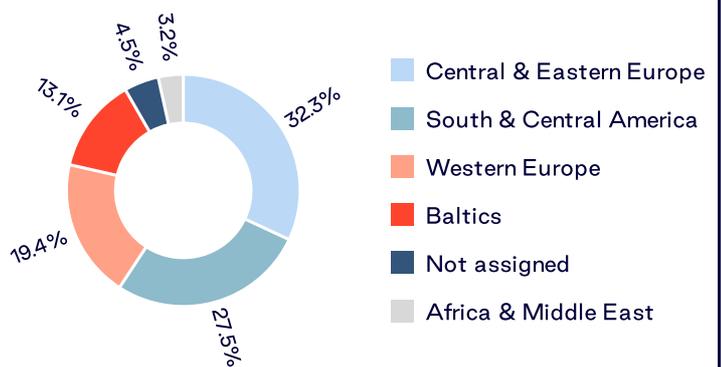

The third quarter of the year has been very volatile, with global equity markets remaining largely unchanged at the end of the quarter. In July, investors started to take more seriously the possibility that the US Federal Reserve (Fed) could cut interest rates in 2023 due to a slowing economic growth. This had a positive impact on equity markets, with stock returns close to 10% in July. However, such hopes were not fulfilled when the Fed gathered in Jackson Hole in August, where the US central bank reaffirmed its commitment to fight inflation, despite the short-term slowdown in growth or the difficulty for consumers. This, together with inflation still above expectations, was the main reason why financial markets corrected in the second half of Q3, with US equity indices ending the quarter in bear market territory (bonds). Similar trends were also evident in Europe, where the energy crisis is exacerbating the situation. The communications sector and real estate companies were the ones hardest hit by the continued rise in interest rate expectations. Rising interest rates have a negative impact on the latter due to rising debt servicing costs and falling property values.

In fixed income investments, current bond yields are becoming increasingly attractive due to rising interest rate expectations. As almost all types of bonds have fallen during the ongoing sell-off this year (sovereign and corporate bonds, as well as bonds with lower and higher credit ratings), high yields can no longer be found only in the riskiest bonds, but also in safer ones.

**GRAPH SINCE THE ESTABLISHMENT OF THE INVESTMENT DIRECTION**

**RETURN ON INVESTMENT IN DIFFERENT PERIODS**

	Investment direction	Benchmark index*
2022 Y. III QUARTER	-2,84 %	-5,04 %

Please note that past results of the Investment Direction do not guarantee the same results and profitability in the future. Past performance is not a reliable indicator of future performance.

**DISTRIBUTION BY WEALTH TYPE**

**GEOGRAPHICAL DISTRIBUTION\*\***

\* From July 1, 2022, the composite comparative index is applied:

50,00% J.P. Morgan Emerging Markets Bond Index (EMBI) Global Hedged Euro Index (JPEIGHEU Index)  
50,00% J.P. Morgan Corporate EMBI Broad Hedged Level in EUR (JBBSHEUR index)

\*\* The geographical distribution is indicated considering the countries of the economic logic of the investments, as well as the investment components of collective investment funds (CIF) and exchange-traded funds (ETF), guided by their reports. If these reports do not specify the investment components of the CIF or ETF, the country of registration of the CIF or ETF is used.
