You are advised to read this document so you can make an informed decision about whether to invest.

Harmonized investment fund “INVL Umbrella Fund” – INVL Global Emerging Markets Bond Subfund

ISIN code: LTIF00000666

This subfund is managed by INVL Asset Management LTD (hereinafter – the Management Company).

Objectives and Investment Policy

The objective of the Subfund is to ensure balanced growth of its assets. At least 80% of the net assets of the Subfund are invested in the most promising emerging market government, municipal and corporate debt securities identified by the manager. The Subfund combines riskier investments (corporate bonds) and safer ones (government and municipal bonds) in order to ensure a stable return on investments.

The Subfund’s assets are invested in global emerging markets, but there are no limitations on investments in terms of industry or other market sectors or in terms of specific asset classes.

If the situation in the market cannot offer better investment opportunities, up to 100 per cent of the assets of the subfund may be invested in deposits, money market instruments and investment units (shares) of harmonized collective investment undertakings, the main investment direction of which is money market instruments or bonds and non-equity securities of other forms. The assets of the subfund may be invested in derivative financial instruments, if they are used for risk management.

The subfund’s benchmark – JP Morgan Emerging Markets Bond Index Global Hedged EUR (J.P. Morgan EMBIG Hedged

Euro, Bloomberg’s ticker - JPEIGHEU). The Management Company can, at its sole discretion, choose specific investments. The benchmark is used indirectly, which signifies an aim not to replicate the results of the benchmark, but to surpass them.

The Subfund is intended for investors with limited investing experience who can tolerate medium risk. Non-professional investors are advised, before investing, to consult with public trading intermediaries or other specialists in this field. Recommendation: the Subfund is not recommended for investors who plan to withdraw their money within less than 2 years.

The subfund’s income is not distributed to participants, but it is re-invested.

Please note that you can redeem your investment upon demand by presenting a redemption order form to the Management Company directly or through subfund’s distributor. This subfund deals on every business day. Your investment units will be denominated in EUR, the subfund’s base currency.

Risks and Reward Profile

The risk and reward indicator shows a ratio between the subfund’s risk and reward. The further the subfund is in this scale, the higher the possibilities of a probable reward, but also the higher the risk to lose money. The first category does not mean that an investment is risk-free.

The risk category is calculated on the basis of the data from the previous year, which cannot reliably show the future risk profile and do not guarantee the future results of the subfund. The subfund belongs to the 4th category. This means that the risk of changes in the subfund’s value is medium.

The risk-return ratio in the scale is not guaranteed and over time it can rise and fall (the subfund can be ascribed to another category).

Here are the types of the risks, which are relevant to the subfund and underestimated when calculating the indicator:

Credit risk. The risk of incurring losses on securities of the issuer’s failure to meet its financial obligations.

Counterparty risk. The risk that the counterparty shall fail to perform its obligations and Fund may expose financial loss. Efforts are made to minimize this risk by concluding transactions with reliable and experienced financial institutions.

Market liquidity risk. The risk to incur losses as a result of low market liquidity that does not allow selling the financial instruments at the desired time and for the desired price.

Operational risk. The risk to incur losses as a result of system failures, human errors or external events, including political or legal risks.

Efforts are made to prevent from adverse market changes for a certain period of time and to reduce the influence of adverse risk factors through the use of derivative financial instruments.
